

# Create And Configure IBM Cloud Services

TEAM ID: PNT2022TMID54441

PROJECT NAME : IoT based smart crop protection system for Agriculture

## Create IBM Watson IoT Platform and Device

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar shows the user is logged in as 310619106120@smartinternz.com with ID: 3xaptt. The main content area is titled "Device Drilldown - 12345" and shows the "Device Credentials" section. The credentials are as follows:

Organization ID	Device Type	Device ID	Authentication Method	Authentication Token
3xaptt	NodeMCU	12345	use-token-auth	12345678

Below the credentials, a warning states: "Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new one."

The bottom section of the screenshot shows the "Browse Devices" page. It includes a search bar, a "Device Simulator" toggle, and a table of devices. The table has columns for "Device ID", "Status", and "Device Type".

Device ID	Status	Device Type
12345	Disconnected	NodeMCU

The table indicates 1 of 1 page and 1 item.
